SCHEDULE C

DESCRIPTION OF WAREHOUSE AND DISTRIBUTION SERVICES

The ENDO/LHSI Warehousing and Distribution Agreement services will include the following:

1. Endo, via e-mail, will provide LHSI notification of incoming purchase orders from contracted manufacturers according to established work instructions. LHSI will provide DEA Form 222 to contract manufacturer for purchase of CII pharmaceutical products.

2. LHSI will create Purchase Order in LHSI computer system (LMS) and Customer Service at Memphis Distribution Center (MDC) will issue a DEA Form 222 to contract manufacturer (when applicable).

   Endo will make sure that LHSI is communicated to via e-mail by all manufacturing sites so that LHSI is aware of both international and domestic in-bound transportation from contract manufacturers to LHSI MDC (Memphis Distribution Center). Actual shipment appointments will be arranged between manufacturing site and LHSI . LHSI is not responsible for customs clearance. ~~Dupont will have the ability to e-mail LHSI MDC with inbound shipment activities. Upon completion of receipt process, via e-mail, LHSI MDC to send receipt acknowledgement notice to Dupont so they can close shipments.~~

3. LHSI performs receipt of incoming inventory from contract manufacturer.
   - Receiver One sorts, segregates receipt by SKU and Lot Number, Expiration date, counts and enters receipt into LMS in a Quarantine (Q) status.
   - Receiver Two re-checks entire receipts and validates both system entry and paper documents in compliance with DEA requirements.
   - Receiver Two also performs RF Scanner put-away functions in Quarantine (Q) status and validates inventory quantity.
   - Supervisor reviews and accepts or modifies any discrepancies in Purchase Order in LMS quantity and inventory received by completing system transaction. LMS quantity on hand is updated and a scheduled EDI inventory receipt will be transmitted to Endo.
   - Supervisor provides copy receiver report to Endo Quality Assurance Associate personnel for review and Quality release. Once product is released, LMS is updated with scheduled updates to SAP.
   - If inventory receipt has discrepancy LHSI is responsible for reporting to Endo Quality Assurance Associate as detailed in work instructions.

4. Endo to perform QA functions:
   - Endo Quality Assurance Associate personnel (2) will process all appropriate Endo paperwork and provide written approval for release of inventory to be transferred to Good Status. Lot sequence visibility is available via a COGNOS report that has been developed by LHSI. LHSI Supervisor to receive copy of Release Authorization.
   - Endo Quality Assurance Associate personnel will identify inventory required for sample retention. LHSI Supervisor to receive copy of QA documentation.
   - LHSI Supervisor performs LMS system update to record movement of sample retention inventory when required. LMS inventory adjustment is transmitted to SAP.
   - LHSI to provide LMS training and visibility to Endo warehouse inventory within LMS.

5. Endo Corporate will be responsible for communicating in writing the initial changeover to all Endo customers, including, but not limited to, the forwarding of all CII purchase orders and DEA Form 222 to LHSI MDC. The Endo Customer Service function that will be performed by LHSI as specified elsewhere in this Agreement, will proactively communicate all changes in distribution to customers as a follow-up to the initial communication.

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER

ENDO-OPIOID_MDL-06250921

6. LHSI to process orders for CII products from LHSI Memphis Distribution Center (MDC) within Controlled Area:
    - LHSI Supervisor or designate will validate all data on DEA Form 222 prior to processing order.
    - LHSI order entry personnel will enter order into SAP. To improve efficiencies a second check of all CII orders will be done, prior to being released through the interface to LMS per Work Instructions. SAP CII report can be utilized for this check.
    - SAP will process order and transmits order to LMS according to agreed upon schedule. LMS will accept electronic order and validate customer DEA information and product information, prior to transmitting to LMS Warehouse Management System for processing. If a change to an order is required, the change must be made manually according to Work Instructions, both in LMS and SAP.
    - LHSI Supervisor to compare pick document to original DEA Form 222.
    - LMS system to process order and allocate inventory based on Endo's FIFO requirements. The limited exceptions to this rule flow from the desire to never have more than two lots open at a given time while accommodating LHSI system limitations. Specifically, if successive lots arrive at MDC which expire before lots already received at MDC, the MDC will complete the lot it is currently shipping. Then the MDC will be permitted to select as the next lot to ship as the lot with the shortest shelf life. In addition, if Quality Assurance Associate puts a lot on Hold at any time, the MDC will be permitted to ship from the next lot with the shortest shelf life. If that same lot on Hold gets released, the MDC will complete the lot it is currently shipping from and then will be permitted to select the next lot to ship from with the shortest shelf life. Inventory allocation control will be achieved through the use of WMS hold reason codes and Cognos report.
    - Picker One – picks and stages order utilizing RF scanner.
    - Picker Two – rechecks the pick and validates the staged order to the original pick document.
    - Packer will package order per mutually agreed upon Work Instructions. Endo packing slip will be enclosed within carton for CII orders. The pack slip will be standard LHSI pack slip with Endo name appearing along the top of the document.
    - Shipper will process all orders through carrier shipment terminals. Initially, MDC authorized FTE will enter pertinent information directly into SAP. Future functionality will allow LHSI new Transportation Management System to electronically provide shipment data via EDI.
    - LHSI designate will perform dispatch function when carrier arrives for outbound pick-up.
    - LHSI will transmit sales order confirmation to LMS Order Management System - which will transmit agreed upon data to SAP. Scheduled transmission will be performed every hour.
    - Normal daily order cut-off times for same day processing and shipping is 3:00pm Central Standard Time (4:00pm Eastern Standard Time).All orders received after these cut-off times will be processed and shipped the very next business day. During peak times (i.e. promotions, backorder processing or unusual customer demands) order priorities will have to be reviewed and approved by Customer Service. All controlled substance orders should not be in transit for more than 2 days. At a minimum, all shipments to customers, with the exception of backorders, will be delivered within 8 business days from receipt of order. These requirements will be reviewed and revised if needed at the end of the 1st full quarter of shipments.
    - Carrier service levels to be determined (i.e. last Fed Ex pick-up 11:30 PM CST)
    - Emergency orders must be shipped according to Work Instructions.
    - Federal Express/UPS labels will be provided to those customers that request them to send CII orders in to the MDC. The Customer Service Order Entry personnel at the MDC will be responsible for this service.

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER

ENDO-OPIOID_MDL-06250922

7. LHSI to process orders for CIII-CV at LHSI Memphis Distribution Center (MDC) within appropriate designated working stations within cage area :
    - SAP will process orders and transmits order to LMS. LMS will validate customer DEA information and product information prior to transmitting to LHSI's Warehouse Management System (WMS) for processing.
    - LMS system to process order and allocate inventory based on Endo's FIFO requirements. The limited exceptions to this rule flow from the desire to never have more than two lots open at a given time while accommodating LHSI system limitations. Specifically, if successive lots arrive at MDC which expire before lots already received at MDC, the MDC will complete the lot it is currently shipping. Then the MDC will be permitted to select as the next lot to ship as the lot with the shortest shelf life. In addition, if Quality Assurance Associate puts a lot on Hold at any time, the MDC will be permitted to ship from the next lot with the shortest shelf life. If that same lot on Hold gets released, the MDC will complete the lot it is currently shipping from and then will be permitted to select the next lot to ship from with the shortest shelf life. Inventory allocation control will be achieved through the use of WMS hold reason codes and Cognos report.
    - Picker One – picks and stages order utilizing RF scanner.
    - Picker Two – validates the staged order to the original pick document
    - Packer will package order per mutually agreed upon Work Instructions. Endo packing slip will be enclosed within carton for all CIII-CV orders.
    - Shipper will process all orders through carrier shipment terminals. Initially, MDC authorized FTE will enter pertinent information directly into SAP. Future functionality will allow LHSI new Transportation Management System to electronically provide shipment data via EDI.
    - LHSI designate will perform dispatch function when carrier arrives.
    - LHSI will transmit sales order confirmation to LHSI's Order Management System (OMS) and then transmitting agreed upon data to SAP Scheduled transmission would be performed every hour.
    - Normal daily order cut-off times for same day processing and shipping is 3:00pm Central Standard Time (4:00pm Eastern Standard Time). All orders received after these cut-off times will be processed and shipped the very next business day. During peak times (i.e. promotions, backorder processing or unusual customer demands) order priorities will have to be reviewed and approved by Customer Service. All controlled substance orders should not be in transit for more than 2 days. At a minimum, all shipments to customers, with the exception of backorders, will be delivered within 8 business days from receipt of order. These requirements will be reviewed and revised if needed at the end of the 1st full quarter of shipments.
    - Carrier service levels to be determined (i.e. last Fed Ex pick-up 11:30 PM CST)
    - Emergency orders must be shipped according to Work Instructions.

8. LHSI to process orders for Rx at LHSI Memphis Distribution Center (MDC) within appropriate designated working stations within warehouse area :
    - SAP will process order and transmits order to LMS. LMS will validate customer DEA information and product information prior to transmitting to WMS for processing.
    - LMS system to process order and allocate inventory based on Endo's FIFO requirements. The limited exceptions to this rule flow from the desire to never have more than two lots open at a given time while accommodating LHSI system limitations. Specifically, if successive lots arrive at MDC which expire before lots already received at MDC, the MDC will complete the lot it is currently shipping. Then the MDC will be permitted to select as the next lot to ship as the lot with the shortest shelf life. In addition, if Quality Assurance Associate puts a lot on Hold at any time, the MDC will be permitted to ship from the next lot with the shortest shelf life. If that same lot on Hold gets released, the MDC will complete the lot it is currently shipping from and then will be permitted to select the next lot to ship from with the shortest shelf life. Inventory allocation control will be achieved through the use of WMS hold reason codes and Cognos report. Picker One – picks and stages order utilizing RF scanner.

ENDO-OPIOID_MDL-06250923

- Picker Two – validates the staged order to the original pick document
- Packer will package order per mutually agreed upon Work Instructions. Endo packing slip will be enclosed within carton for all Rx orders.
- Shipper will process all orders through carrier shipment terminals. Initially, MDC authorized FTE will enter pertinent information directly into SAP. Future functionality will allow LHSI new Transportation Management System to electronically provide shipment data via EDI.
- LHSI designate will perform dispatch function when carrier arrives.
- LHSI will transmit sales order confirmation to LMS/OMS and then transmit agreed upon data to SAP Scheduled transmission will be performed every hour.
- Normal daily order cut-off times for same day processing and shipping is 3:00pm Central Standard Time (4:00pm Eastern Standard Time).All orders received after these cut-off times will be processed and shipped the very next business day. During peak times (i.e. promotions, backorder processing or unusual customer demands) order priorities will have to be reviewed and approved by Customer Service. All controlled substance orders should not be in transit for more than 2 days. At a minimum, all shipments to customers, with the exception of backorders, will be delivered within 8 business days from receipt of order. These requirements will be reviewed and revised if needed at the end of the 1st full quarter of shipments.
- Carrier service levels to be determined (i.e. last Fed Ex pick-up 11:30 PM CST)
- Emergency orders must be shipped according to Work Instructions.

9. LHSI MDC to process all other types of orders (same classes as above) according to above and Work Instructions (i.e. promotions, clinical study orders, stock fulfillment orders, shortdated orders).

10. All Endo backorders, when product is released, will be processed according to Work Instructions.

11. Endo Pharmaceuticals will be adding new products to its portfolio and LHSI MDC will be responsible for providing all services described in this scope for any and all new products, provided that these products require same type of PDMA storage specifications as existing products.

12. LHSI MDC must comply with special customer order requirements such as dating; ship requests will be passed through interface via customer notes.

13. LHSI to perform transportation management for Endo for all outbound orders.

    - Carrier selection to be mutually agreed upon by Endo and LHSI
    - LHSI to perform random audit of freight invoices.
    - LHSI to manage freight payments and audits.
    - LHSI to conduct carrier performance audits.

14. LHSI to perform the following Inventory Control functions utilizing segregation of duties:
    - Complete redundancy (double check) of receiving and picking functions for controlled substances (i.e. Receiver 1, Receiver 2 and Put Away checks). For ambient products Receiver 1 checks and then a Put Away check as well.
    - LHSI Supervisor will validate all inbound receipts and all internal product movement.
    - LMS to provide a previous workday ending inventory update to SAP by 8:00 AM EST each morning.
    - LHSI to perform daily physical inventory count on all active controlled substance lots and locations.
    - LHSI to perform non-controlled inventory cycle counts 8% (1/12) of location per day.
    - LHSI MDC Managers (Director., Distribution Center Manager, Office Manager) is solely authorized to approve inventory adjustments of controlled substances.
    - LMS RF functionality electronically restricts warehouse personnel access to proper warehouse zones.

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER
Source: https://www.industrydocuments.ucsf.edu/docs/lxwk0433
ENDO-OPIOID_MDL-06250924

- Control cage card access limits LHSI employees access to controlled areas.
- If inventory receipt has discrepancy, LHSI is responsible for reporting to Endo Quality Assurance Associate as detailed in Work Instructions.
- LHSI MDC is responsible for investigating shortages, incorrect shipments, and reporting to Customer Service according to Work Instructions.

15. LHSI to perform DEA/ARCOS Compliance Validation and ARCOS Reporting:
    - All daily receiving and shipping documents to be maintained in a secured area outside of control cage.
    - DEA Daily Edit Report of LMS controlled substance transactions will be generated next business day. This report contains all LMS DEA transactions performed the previous day.
    - LHSI non-controlled substance Warehouse Associate will validate the official receiving and shipping documents to the DEA Daily Edit Report.
    - LHSI does perform a monthly product reconciliation for all classes of controlled substances comparing a report of monthly DEA transactions to the month end physical inventory. This ensures the DEA electronic file confirms the physical inventory.
    - LHSI will perform quarterly ARCOS transmissions of all activity

16. LHSI will manage the handling and processing of short-dated, damaged or expired inventory on behalf of Endo to be sold to Pharmacy Solutions, Inc :
    - LHSI to submit inventory report itemizing product, quantities and lot and category of product.
    - Endo Customer Service Manager or designate and Quality &Compliance to approve request for destruction. Order entry for destruction orders will be perform solely within LMS OMS/WMS processes. LMS will validate Pharmacy Solutions, Inc. as the customer, product information and quantity prior to transmitting to WMS for processing.
    - If CII product is involved, LHSI will contact Pharmacy Solutions, Inc. and request them to issue DEA Form 222. LHSI Supervisor will compare pick document to original DEA Form 222.
    - LHSI will process the order as outlined above.
    - LHSI will process all product destructions according to all DEA guidelines.
    - LHSI will provide Endo Quality Assurance Associate with copies of Pharmacy Solution acknowledgement documentation.
    - LHSI destruction process will be audited and reviewed from time to time by Endo Quality Assurance Associate.

17. LHSI will manage receipt, handling and processing of all authorized returns.
    - Endo Customer Service and Distribution will process all authorization requests for return merchandise based on Endo Returns Policy and according to Customer Service Work Instructions.
    - If in-date product is returned (i.e. mis-shipment,), that product can be put back into inventory after Endo Quality Assurance Associate approves.
    - LHSI will receive and process return based on mutually agreed upon Work Instructions.
    - LHSI will store return merchandise in designated area under Quarantined status until authorized by Endo (Customer Service Manager or designate and on-site Quality Associate for destruction as detailed in Work Instructions.
    - If CII product is involved, LHSI warehouse operator will send customer a DEA Form 222 so that customer can return product.
    - Process for destruction is outlined above.
    - All returns should be processed within 5 working days from the date of receipt.
    - LHSI will be required to process all full container returns. Full container is defined, as original manufactures seal intact. In the event of a partial container receipt, LHSI will be required to perform manually regulatory reporting requirement. LHSI will be responsible for keying partial return credit in SAP system.

Source: https://www.industrydocuments.ucsf.edu/docs/lxwk0433

- Returned Products to be received, handled and processed are specified on Schedule A-I and A-II.

18. LHSI will provide a Shipping History Report by Lot Number, by customer should a Recall be issued by Endo. LHSI will assist in executing recall i.e. communication to customers, and receipt of product in controlled area according to Endo's Recall policy as a special project.

DESCRIPTION OF LHSI WAREHOUSE FACILITY

1548 376 4057

1. LHSI to provide PDMA/DEA compliant space for ~~800~~ pallet vault, ~~500~~ pallet cage and ~~1000~~ ambient pallet positions at 1910 Danielson Road, Memphis, Tennessee 38114.
2. LHSI to provide security systems to include cameras located in the receiving, vault, cage and shipping areas; video, limited ID card access to controlled areas, and pocketless uniforms.
3. LHSI to provide designated office space complete with furniture, telephones and Personal Computers for Endo Quality Assurance Associate and LHSI Order Entry personnel.
4. ~~LHSI to provide warehouse space and storage for 4 pallets of refrigerated CII, ambient control for remaining products.~~ LHSI provide 2 Refrigerators For Storage of Temp sensitive products.
5. LHSI to provide warehouse equipment (forklifts, racking, RF scanners, pick lines, carrier terminals, communication lines, and terminal hardware).
6. LHSI to provide secure trucking lounge for truckers.
7. Upon completion of construction of MDC, Endo and LHSI should review and agree on location of security cameras and overall state of security in general.
8. Emergency after hour on-call beeper is available. Emergency orders will be processed as per work instructions

DESCRIPTION OF INFORMATION TECHNOLOGY SERVICES

1. LHSI will provide LMS2000 platform for warehouse management functions and train appropriate Endo QA personnel.
2. LHSI will participate in the project management, design, and development of LMS2000 interface with SAP.
3. LHSI will provide LMS2000 test environment and participating in interface validation.
4. Endo will provide SAP test environment and participate in interface validation.
5. LHSI will provide terminal hardware, software and connectivity for Endo Quality Assurance Associate personnel and LHSI order entry associate.
6. This document contains many statements that refer to EDI Transmission and RF functionality. The following is a definition of these statements and how they will be applied through out LHSI applications and this document:
   - EDI Inbound and Outbound transmissions will be scheduled every ~~hour~~ ½ hour between the hours of 8:30AM to 11:30PM EST, or more often as agreed upon.
   - RF is defined in many of LHSI day- to-day activities. In the event of system failure, LHSI will perform receipts, put away, stock move and picking utilizing workstation and paper. The workstation / paper mode is fully capable of performing the same task and providing the same results.

DESCRIPTION OF HUMAN RESOURCE SERVICES

1. LHSI to recruit, hire and train appropriate LHSI personnel to provide the Services.
2. LHSI will conduct background checks on new LHSI employees.
3. LHSI will perform initial drug testing and conduct random drug testing of all active employees.
4. Endo to provide LHSI Hold Harmless Agreement for Endo Quality Assurance Associate personnel stationed at LHSI Memphis Distribution Center.
5. Endo Quality Assurance Associate personnel will adhere to all LHSI employee policies and have access to Memphis facility limited to standard business hours of operation.
6. LHSI to assist Endo in the recruiting process for Quality Assurance Associate.
7. LHSI to provide limited access to controlled areas (vault and cage) and only limited employees will be able to work those areas.
8. LHSI will adhere to the required GMP, DEA, OSHA AND EPA regulations.

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER

ENDO-OPIOID_MDL-06250926

SCHEDULE C (continued)

DESCRIPTION OF CUSTOMER SERVICE AND CHARGEBACK PROCESSING SERVICES AND ACCOUNTS RECEIVABLE SERVICES

The ENDO/LHSI Customer Service, Chargeback Processing and Accounts Receivable implementation will include the following:

1. Endo will provide LHSI access to SAP to perform Customer Service, the processing of chargebacks, returns and Accounts Receivable services.

2. LHSI will supply the necessary phone lines to handle customer inquiries and process orders by phone or fax.
   - seamless transfer of customer medical information calls to appropriate Endo personnel
   - seamless transfer of customer calls to Endo corporate
   - seamless transfer of customer calls regarding customer complaints to appropriate Endo personnel
   - handle peak times

3. LHSI will provide an address for mail orders and any other correspondence that should be directed to LHSI.

4. Endo will handle all initial EDI setup, in conjunction with LHSI, using SAP. Current EDI transactions supported are purchase orders, chargebacks, chargeback reconciliation, invoicing and award notifications. All future EDI transactions and/or customer additions to existing accounts will be handled by ENDO in conjunction with LHSI. Initial EDI training for LHSI will be provided at Endo's expense and is included in the start-up fee. LHSI is responsible for the following:

   - monitoring EDI error reports
   - recording customer calls regarding EDI inquiries and/or problems
   - communicating on a daily basis to Endo any inquiries and/or problems

5. LHSI will be responsible for communicating the initial changeover to all Endo customers which will include changes such as telephone numbers, addresses, changes in returns processing, etc.

6. Endo will establish protocols with LHSI's Memphis Distribution Center ("MDC") to handle CII narcotics orders (DEA form #222). LHSI's MDC Customer Service Representative will be responsible for entering all CII orders in SAP at the LHSI MDC. LHSI Customer Service will have access to all order information related to CII orders to be able to respond to customer inquiries.

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER
Source: https://www.industrydocuments.ucsf.edu/docs/lxwk0433
ENDO-OPIOID_MDL-06250927

7. The MDC will provide ship confirmation and shipment tracking information to SAP so that LHSI can inform customers of order ship dates.

8. The MDC will provide inventory information to SAP so that LHSI has access to on hand inventory, and product in quarantine.

9. LHSI, in the absence of electronic invoicing, will mail invoices to Endo's customers. Postage costs will be passed on to Endo.

10. LHSI will provide the staffing and training necessary to conduct the following customer service and chargeback functions:

- Call Management to include
  - Primary contact for customers, responding to all customer inquiries within 24 hours. It is assumed that a LHSI customer service representative will answer all customer calls and handle according to established work procedures.
    - Customer service hours to be from 8:00 am - 6:00 pm
    - Emergency calls – Beeper coverage, numbers referenced. It is assumed that ENDO will require the MDC to have someone available to respond. Time spent for emergency response will be charged at the Agreed overtime rate.
    - Order inquiries
    - Shipping errors
    - Product complaints
    - Return authorizations (CIIs only) Forms faxed for others.
    - Chargeback inquiries
    - Invoice inquiries
    - Pricing inquiries
    - PODs
    - Adverse Events forwarded to appropriate Endo personnel as detailed in work procedures.
    - Emergency calls – Beeper coverage. It is assumed that ENDO will require the MDC to have someone available to respond
  - Telephone Metrics
    - Report customer calls outlined in work procedures daily.
    - Inbound calls
      - Number of calls
      - Number of Abandoned calls
      - Average speed of answer
      - Duration of call
      - Types of calls (i.e. medical affairs vs customer service)

Source: https://www.industrydocuments.ucsf.edu/docs/lxwk0433

- Outbound calls
  - Number of calls
  - Average duration of call
  - Hourly report (to monitor peak times for proper coverage)

- Order Entry (except CIIs), Maintenance (except CIIs) and processing of all orders to include
  - Customer number verification
  - Validation of valid DEA license and schedule verification, valid state license, credit checks
  - Order modifications
  - Excessive order checks
  - NDC and pricing checks
  - New business checks (new item purchased)
  - Trade Show orders
  - Promotional orders
  - Export orders
  - Drop shipments
  - Rush orders
  - Re-work on orders (i.e. damages, order entry errors, etc)
  - Shortdated orders, overstock orders
  - Clinical study orders
  - Product complaints – credit/product replacement
  - PODs
  - Physician personal use units according to Stock Fulfillment procedure
  - Donations
  - ~~Patient~~ Assistance Orders.
- LHSI will be responsible for backorder management and processing
  - Handle backorders according to customers' request (customer's cancellation policies)
  - Proactively advise customer of all backorders and expected delivery dates whether EDI or manual order (assuming SAP or Endo can provide this information)
  - Work with MDC to prioritize backorder shipments
  - Handle according to Endo's procedures and work instructions
  - ~~Participate in weekly backorder meetings with Endo~~

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER
Source: https://www.industrydocuments.ucsf.edu/docs/lxwk0433

SCHEDULE C (continued)

- LHSI will be responsible for Customer and Product Master file maintenance to include but not be limited to:
  - Assistance with initial file loads of Customer Master profiles, including drop ships
  - New account setups
  - DEA updates
  - ~~Salesman updates~~
  - Customer/Product eligibility

- LHSI will be responsible for the preparation of letters to customers for DEA license 30 days before expiration. LHSI will also be responsible for maintaining copies of all applicable customer licenses, including DEA licenses.

- Day end activity reporting (assumes SAP generated)

- Customer invoicing (assume SAP generated) to include
  - Processing of all Invoices
  - Processing of price equalizations
  - Processing of return credits, including electronic and manual processing
  - Processing of all credits, including electronic and manual processing
  - LHSI will work with Endo to have invoices printed

- Chargeback validation, processing and reconciliation to include:
  - 72 hour turn around time (credit to customer) The assumption is that at least 90% of the transactions are via EDI
  - Handle all inquiries from customers related to chargebacks
  - Manual entry of chargebacks
  - Assist in resolving all chargeback errors with wholesaler customers
  - ENDO is responsible for Group membership and wholesaler updates
  - Primary conduit for National Account Executives for all customer inquiries or requests regarding chargebacks

- Return Authorizations
  - Handled return authorizations according to Endo Returns Policy and Procedures

- Promotions
  - ~~LHSI will be responsible for mailings/fax explosions for new product launches and promotions. This activity will be on an accessorial basis.~~

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER
Source: https://www.industrydocuments.ucsf.edu/docs/lxwk0433
ENDO-OPIOID_MDL-06250930

- LHSI will proactively call accounts to build an awareness of promotions/new product launches. ~~This activity will be on an accessorial basis.~~

11. LHSI will be responsible for Accounts Receivable for Endo which includes:
    - Deposits
    - Cash Management and Application
    - Adjustments
        - Short Payments
        - Cash Discounts
        - Payments on Accounts
        - Credits/Debits
        - Chargebacks
        - Write Offs
        - Slow Payer's
    - Collections Management and Deductions/Dispute Resolution
    - Reporting
    - ENDO is responsible for credit management (e.g., establishing customer credit limits, placing and releasing customer orders on credit hold).

12. MDC will be responsible for all ARCOS reporting and tracking.

13. LHSI will allow Endo to do random checks on how customer calls are handled.

14. Endo will be responsible for all contracts, pricing and rebate administration, including Medicaid (assumes on SAP).

15. LHSI will be responsible for Record Retention for all services Agreed upon in accordance with the Work Instructions as well as those Record Retention services described in the Agreement.

Key Assumptions:

- LHSI does not provide support for SAP.
- ENDO will provide help desk support for SAP.
- ENDO's customer base will contain only customers holding current state and federal licenses to distribute pharmaceuticals (e.g. DEA license, wholesaler distribution license).

HIGHLY CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER
