Team,
Per below and attached, Procurement and finance are trying to get better control of FedEx shipping costs. For the areas you support, please provide a list of who should have freight shipment authority for R&D and Regulatory (only these people will be allowed to approve shipments).
Please complete the attached form (List of Hazelwood Administrators) for your areas and return to me by Monday, April 27 for consideration.
Thanks for the continued support.

Dear Colleague:

Every day, we have over 50 invoices unaccounted for, that we have to research and code with a cost center number in order to pay the carrier invoice. Ninety-eight percent of these invoices are interoffice, R&D, or inbound packages, sent via FedEx. The process we use to look up who owns the shipment and what cost center we should apply the charges to is very tedious. It usually takes up to half a day to assign the cost centers. We need your help to make this process more efficient!

We recently conducted a presentation at the plants that highlighted the different roles and functions within the shipping process, as outlined below:

Requisitioner: The Mallinckrodt employee (contractor) with a shipping need.

- Must satisfy a customer request, a material transfer or an internal need.
- Must identify shipping requirements/conditions.
- Must identify shipping information.
- If Mallinckrodt is paying, a valid cost center must be provided prior to shipping.

Executioner: The Mallinckrodt employee (contractor) responsible for fulfilling the need.

- Assists the Requisitioner in fulfilling the need and identifying all the shipping requirements.
- Assists in identifying the data and documentation to identify the proper accounting (cost center).
- "Fulfilling the need internally" could mean translating the shipping tender to an external carrier/service provider.
- Could also be a Requisitioner.

Administrator: Responsible for the administration of the Freight Bill Payment Program.

- Ensures compliance in management of the program
- Ensures accurate accounting rules and cost center allocations.
- Resolves "suspended" transactions.
- Manages the team of Requisitioners and Executioners.
- Could also be a Requisitioner and Executioner.

To help us make the shipping process more efficient, please fill out the attached Administrator spreadsheet and return to me at Rich.Loeschner@mallinckrodt.com. I need to create a FedEx

Source: https://www.industrydocuments.ucsf.edu/docs/nflx0245

account number for each cost center for the employees to use when shipping in the future. There needs to be an administrator to give out these FedEx Account numbers to the Requisitioners, coordinated the creation of FedEx accounts with Transportation Department, and advise Transportation Department of any Cost Center changes.

In addition to the above, please consider the following:

- Currently, there is no budget for most postage cost centers, but if you ship 10 shipments a month, that could add up to about $1,200 per year.
- We need cost center codes on shipments for supplier to QA vendor, printed material to go to an event or warehouse, and shipments from one convention center to another.
- Attached is a Shipping Instruction Form to be filled out by the Requisitioner, included in the package for the Executioner to fill out the FedEx.com shipment documentation. Again, I must stress that a valid cost center number must be written on the form.

Thank you for your cooperation and assistance in this matter. If you have any questions, please feel free to contact me. I will contact you later this week to see what we need to do to help get this accomplished.
