1Z4E1A340350162477 UPS Sm 32942135 3 LOST PKG going to AmerisourceBergen in TUKWILA, WA signed for by an unknown person OVALLES. WRONG location AmerisourceBergen Kent did not receive 168 Oxycodone 15MG NDC# 00228287811 7 cases, 6-29-11 The security officer went to the store and spoke with the receiving associate. He remembered the package and he gave it to his manager. The manager is out until Thursday, they will be making a follow up visit then. They will keep me advised. 7-5-11 update from the security manager in the west, he stated he will be reviewing tapes with the CHAMPS corp security on Tuesday and has not heard back from the FedEx contact as of yet but probably due to the Holiday. More updates will follow Tuesday. 7-13-11 Updates - follow up from our security and the Fedex Security, they have spoken with their driver who picks up at the misdelivery location, they have searched the local buildings and they have searched what is their version of the overgoods process. Their driver has to scan all the packages he picks up otherwise he does not get paid. Their other searches came up negative as well. At this point, our research has been completed and as you know, the product has not been located If we have any further updates we will advise, otherwise consider this investigation closed. Sent to Security to investigate and have the claim over turned 5-29-12 update- OMNICare received 40 plus packages on the same day with the name of Slown as the signature. No other claims on these other packages. The normal driver talked with the business and was not able to get a positive outcome. The normal driver stated that there is a person named "Sloan". Might be an error of the driver clarifying the last name. 5/25/1205/31/12

DELIVERED 6-8-12 received case 1 of a 4 case order back from the order (SO787567) (0447858011) and the case, was delivered empty. Troy did check the other 3 case tracking #'s in UPS.com and it shows that McKesson did sign for them but they refused case 1. The whole shipment weighed 59.19 pounds according to the packing slip and the 3 cases that McKesson signed for show as weighing 19.70 each which would give you a total of 59.10 pounds.if the 1 case which weighed 2.5 pounds was empty from the beginning. 5/23/1206/01/12

1Z4E1A340367218591 UPS SM 285314 Damaged-Delivered Package going to Smith Drug Obviously something strange occurred with this package but there is no evidence that it was repacked according to the package progress Notified Security reviewed this issue with security, and the center had run out of re-wrap supplies and a supervisor went to the local Office Depot and bought cartons until their supply requisition has been filled. We had advised the center never to re-wrap damage packages and deliver to the consignee. Make sure they are always RTS. This is a damage of 5 pieces of item 45963-439-65 that needs call tags. This was repacked by the carrier in an office depot box and it shipped on 5/23 via UPS tracking 1Z4E1A340367218591. However, the customer wants to keep 19 bottles but I would think call tags would have to be issued for 24, 5/23/1205/29/12

1Z4E1A340367126289 UPS SM 446858011 4 Damage 7 Pkg Going to SMITH DRUG COMPANY in PARAGOULD AR THE RECEIVER DID NOT WANT THE ORDER AND REFUSED THIS DELIVERY RETURNED TO SHIPPER Ken Von Spreckelsen spoke to Vicki and explained that the driver or the customer cannot determine if it is damaged unless it is opened at the time of delivery. Since the customer does not want to open it because the box looks in bad shape, the driver has no choice but to select the option stating customer refused.She now acknowledges that the driver cannot make the determination and will have to rely on the UPS Louisville operations team to make the determination when it gets back to the UPS facility. Some of those bottles where broken and it was not in its original packing. Feedback from security, provided tr# 6-4-12. 6-5-12 Vicki mentioned to me that your team is doing a much better job logging the reasons for the returns, but she asked that I point out how important it is to make sure a reason is logged for each return, especially the ones where the customer refused so they know why. She gave an example of April 28th refused by Ekard had no reason. 3/9/1204/12/12

Each package weight 33.7 lbs so it looked like it shipped with an even amount in each carton. She advised them to send a debit memo for the 12 each that they claimed they were short. If there was a 12 each shortage probably originated during the picking and packing process. Why I do not have absolute confirmation that they received both cartons.. She think that they did..This is the customer that we have frequent unsigned, damaged and missing items.

additional service performed. Following up with Averitt. Averitt Corp Security investigating shortage & shipmnt having clear wrap. Still waiting on feedback Security Inspection - is done by the customer Drivers are required to show ID and the trailer Shipper's black shrink wrap was intact at time of delivery". The driver marked clear wrap in error . Averitt does not use clear wrap in there terminals to re-coup shipments, blue wrap is used. The consignee signed the delivery rcpt clear and broke the shipper's wrap and counted while the driver was present (29mins). No shortage was mentioned. Also the driver's notation of a security inspection was marked as an error. This consignee requires the driver to sign in and wait in a caged, secure area until it is his or her turn to be unloaded. This is normal procedure in most pharmaceutical companies, so the drivers are not wandering around in there facility. On a true security inspection this done by the customer not by actual security this requires the drivers to show ID and the trailer is inspected, but the FRT is not handled. 6/8/1206/13/12

Returning to the DC- Claim not approved -The single wall box was not adequate to support the weight of the merchandise/The merchandise was not placed properly within the packaging to protect it sufficiently
Dispute with the claims department stating Cyproheptadine packaging box is double wall with a double wall partition and a double wall pad on the bottom and top of the bottles. The partition is made in a way that the bottles do not touch each other or the inside walls of the box on any side. There is no room in the compartments for the bottles to move side to side and top and bottom pads stop movement up and down. returned on 07/18/2012 at 9:53 A.M. signed for by STEPHENSON 7/25/1208/03/12

935746453 9 Sm PKG 486681 Damaged Shipment going to PRESCRIPTION SUPPLY CORP in NORTHWOOD OH Reported Damage Following up with carrier All FRT was accepted, shipment moved through our system clear until it reached our Indianapolis terminal from Louisville who noted that there was some visible damage to the freight. This has been brought to the Louisville terminal manager's attention for handling with his team Vicki spoken with Jacob Sieving at Prescription Supply regarding damage for return. While some damage is noted on the delivery receipt he has advised that all 12 cases (entire order) has broken bottles or is wet from broken product. While some damage was noted on the DR, the order was in a Gaylord box and not all damage was noticed at receipt. CT1795 05/17/115/20/11

843337040 8 UPSFRT 769376 CONSIGNEE REFUSED PART OF SHIPMENT; BALANCE DELIVERED one of the skids' shrink wrap was torn but not broken and the carton had slight damage Checked with the destination terminal in Brooklyn to see what condition the freight arrived into their terminal i. also asked terminal to interview the driver that delivered this to see if he has any information regarding the damage/shortage
This was returned to Warehouse on 1/21/10 227921551. The consignee noted at time of delivery that 1 carton was damaged and refused it. Also had not been notified of a shortage on this yet so I have noted your information below in the system. Driver in his 1 case is a carrier issue. The 2 cases have not been adjusted back in. On the returns log The terminal also advised that this particular customer always signs 'subject to count & inspection' and they are known to never sign anything clear, in regards to the shortage, the freight was not counted at time of delivery. 1/11/101/11/10
931836043 9 UPSFRT SPW20164 This order was refused because it had been restacked and rewrapped after shipping Omnicare refused because the product was a total mess and since it was control products it was refused. I need a detailed root cause explanation and a corrective action regarding this shipment. 3/24/10 3/25/10169020316 1 Con-way 8194735393. 8 shortage Found Case of 6 each Clonazepam .5mg 500's that was not delivered to McKesson on Crumpler in Memphis, TN. Security walked the dock Security also spoke with the driver trailer was opened at the service center in Memphis, TN. This shipment arrived from XLU "wedged" against the back door and when the door was opened this one skid fell to the ground upside down. Four employees re-couped or "scooped" the skid, placed this on another skid, restacked the boxes into the outer cardboard box, and applied the blue shrink wrap.The driver remembers seeing the one box for Grenada, MS and placing this into the McKesson box. He stated that he did not look at the labels but remembers seeing the packing list assuming that this box went with the McKesson order. He stated that the seal did match when he opened the trailer.He had one box that had no labels or other identification and this one box was placed on top of one of the other McKesson skids and sent to the city loading door. The other McKesson shipments off of trailer 715-4227 went to 5960 East Shelby Dr.Con-Way next step is for the service center to contact the McKesson location at 5960 East Shelby Drive regarding the one box on top of the other shipments and also speak with the driver who delivered to the McKesson at 5960 East Shelby Drive, and ask them about the one carton overage. The missing carton has been found but there was a bottle missing from the carton so corporate security was immediately informed of this and will be conducting more interviews The carton with the missing bottle has been placed in safe keeping. When loading the dockman verified the label and information on the bottom pallet but failed to verify the information on the top pallet. This resulted in the initial mis-load and resulted in the two pallets travelling through our system as one piece. responsible for the mis-load has been given a written warning for not following OD policy of checking each individual piece of freight before loading. Furthermore each member of the dock crew has been advised of the high sensitivity of Activis's shipments. It has been reiterated that each individual pallet should be checked to verify addresses and pro number before loading. 5/3/105/13/10

James at AmerisourceBergen has responded that frequently the case count on the Delivery Receipt (both Conway at Old Dominion) is seldom accurate. This seems to be unique to Actavis shipments only. Dawn and I have requested the packing list from UPS as we are thinking that perhaps there are items in which the cases are over-packed into a larger containing by manufacturing and that the order is large enough that the overpack carton containing the cases is shipped and being counted as one case at receipt rather than the individual cases inside. 5904863940. 5 Old Dominion 258052L Short Shipment going to bellco there was disagreement over signing short on the Delivery Receipt. Followed up with Carrier, The driver called his manager w/ the shortage and I asked him to verify w/ consignee what they were missing. First, consignee stated that it would take "hours" to check in these 112 ctns. Then after some convincing on my drivers part they agreed to go through. If we are short on our end we are responsible for item #'s and quantity, yet consignee isn't required to do so? Upon re-checking this freight, it was discovered that 4 of these cartons were master cartons, containing 8 pieces inside, not 1. Based on that finding, total piece count increased from 112 ctns to 140. Freight is labeled "master carton containing 8 ctns". Consignee agreed that these were the short cartons and signed ODFL's delivery receipt w/ the updated notation. Consignee refused to update their copy with this new information verification from Bellco Drug that they received all items 9/22/109/24/10

5904856126. 5 Old Dominion 8504603 Damaged Shipment going to ABC in Sacramento CA was damaged in-transit at ODFL Parsons, KS service center. Carrier contacted us with the issue Of the 9-inner cases on this skid, one case had a bottle of syrup like product, that was leaking, and its inner content has leaked on 3-cases, leaving 6-casesintact. 3-ctns will return to Louisville, KY on reference pro 99736022213. PAR terminal not sure what happened with this shipment, as when I found it sitting on the Parsons, KS dock, the shrink wrap was not intact, and there were not any compression marks on the inner cartons to indicate what might have caused the damage. One inner bottle of syrup, was cracked, and leaked its entire contents, causing damages to 2-other cases of this 9-ctn order.Handling of this freight has been covered with the Parsons, KS dockmen,so nothing like this will occur in the future. 10/4/1010/7/10

Followed up regarding missing bottle.Carrier not able to locate 106 need will be filed Yes it is possible. On full pallet shipments we will tape a lid to the top of the body and slide it over the top, rather than re-stack a full skid. This order is not a full skid and should have been stacked into a gaylord. It is very possible that someone made a mistake and just slid a gaylord over the top. On the day of delivery the driver was not allowed on the dock to inspect where the damaged carton was located on the pallet but they informed him it was too crushed to sell on the shelf and placed it back on his trailer as a refused order. Again he was not allowed on the dock this day to inspect the problem. DET will work with local Arbor Drug to always ask for access to their dock in the event there is an exception on their delivery freight. DET will also also work with internal dock associates locally to check each order more thoroughly to make sure exceptions are noted properly upon arrival. returning on pro 207335375 10/13/1010/26/10
