Subject:	ABC/ICS Freight Agreement

Kathy,

I have researched the documents. The original ICS Freight Agreement was for Non-Controlled Products only. That agreement was superceded with a new Agreement effective January 1, 2015, **that covered controlled and non-controlled**. The understanding was non-controlled transitioned to the single ship point in Lockbourne, Ohio, effective January 12, 2015, and that controlled would transition to Lockbourne upon ICS's receipt of required licenses (expected 1Q15). The fact that Controlled products appeared on the March invoice must mean they have secured the licenses?

Lisa/Scott,

If that assumption is not correct, please let me know. Two Opana ER Sku's and Percocet were on the March invoice. Unless you inform otherwise, Kathy will add the remaining controlled products to the rebate so that the fee is accurately accrued for.

Kathy:

The products to be added to the Freight Rebate going forward would be: Fortesta, Natesto, Opana Brand (IR, ER, Inection) and Percocet.
