Introduction

The interface for resolving rejected freight bill exceptions through the Freight Bill Authorization (FBA) application on CassPort has been enhanced to make your portion of the resolution process clearer, and allow confirmation so that you can review your resolution before submitting it. The change is only to the interface – you have the same resolution options as before.

Enhancements have been made to FBA resolution for single invoices and mass modify resolution for resolving multiple invoices at once.

The enhancements fall into several categories:

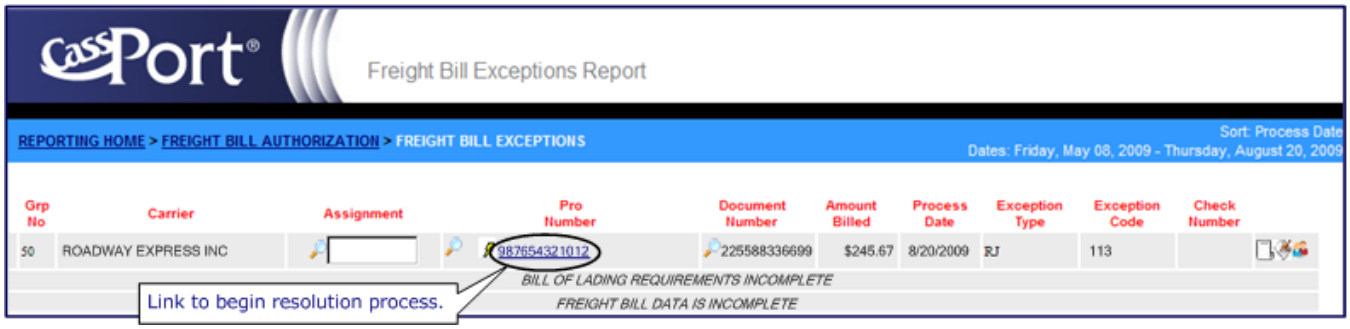

- **Navigation** – Enhancements to improve your ability to know where you are in the resolution process and confirm or change data before completing the process.
- **Option Clarification** – Enhancements to ensure all users understand the action being selected or reviewed.
- **Standardized Reasons** – Enhancements to reduce the amount of data entry required while providing useful information for carriers.

This document provides you with a quick tutorial showing you how these enhancements affect your use of FBA to resolve rejected freight bill exceptions.

Resolving a Single Rejected Freight Bill Exception

You will begin the resolution process as you always have – by clicking the pro number of a rejected freight bill exception on the Freight Bill Exception report.

There have been no changes to the Freight Bill Exceptions Report.

When you close the freight bill image, the first enhanced Reject Resolution – Single dialog will display:

Reprocessing a Single Freight Bill Exception

1. Click **Reprocess** from the first Reject Resolution – Single dialog.

   The second Reject Resolution – Single dialog displays.

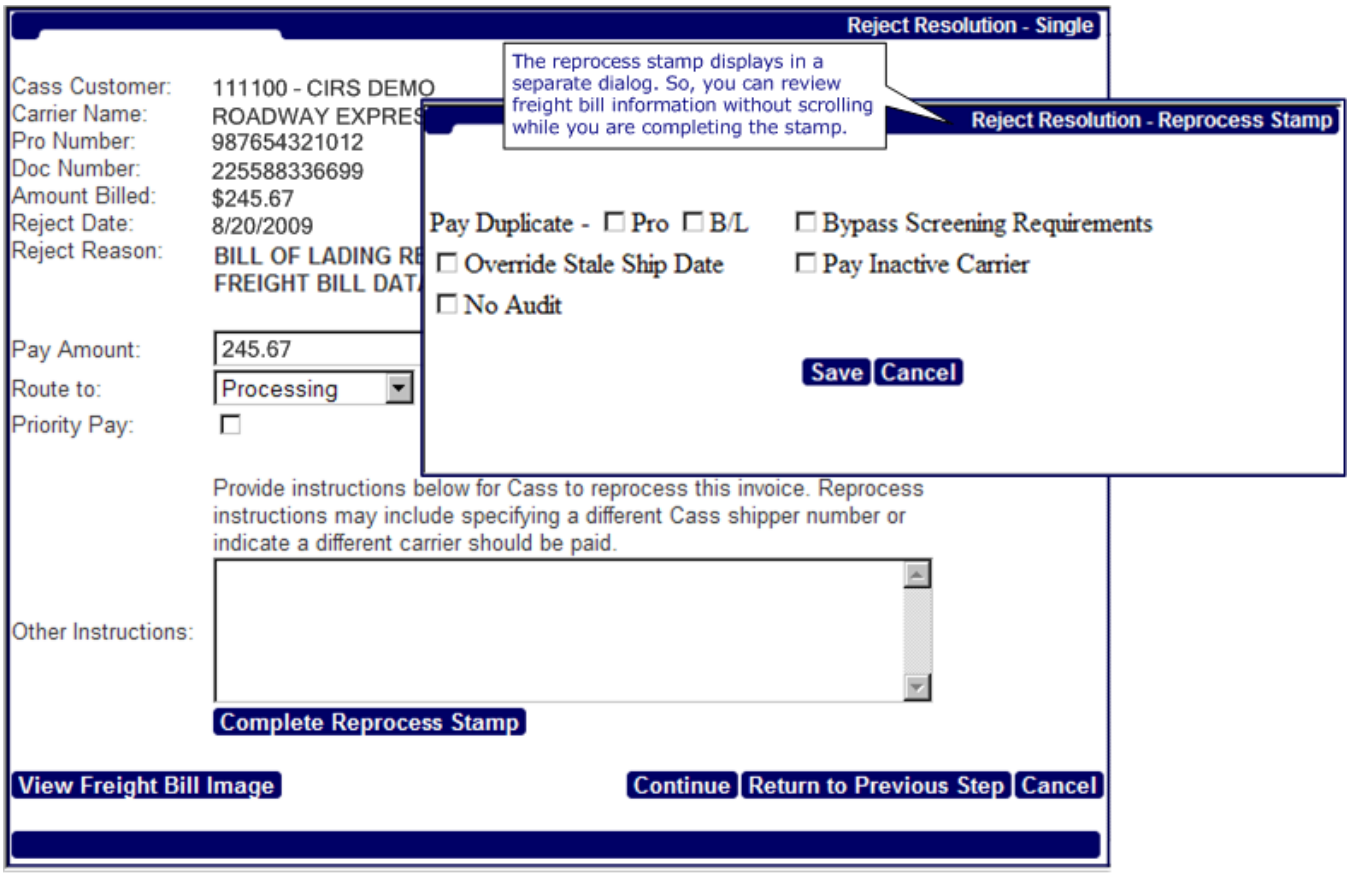

2. Enter information in the Other Instructions field, such as a different location to pay.
3. Choose whether to complete the reprocess stamp:
   - If you need to complete the stamp, click **Complete Reprocess Stamp**. Go to the next step.

     The Reject Resolution – Reprocess stamp dialog displays overlapping the second Reject Resolution – Single dialog.

   or

   - If you do not need to complete the stamp, go to step 6.

© 2009 Cass Information Systems, Inc.

4. Complete the Reprocess stamp.

   Note: The stamp in this image is a generic stamp used as an example. Your stamp may look different.

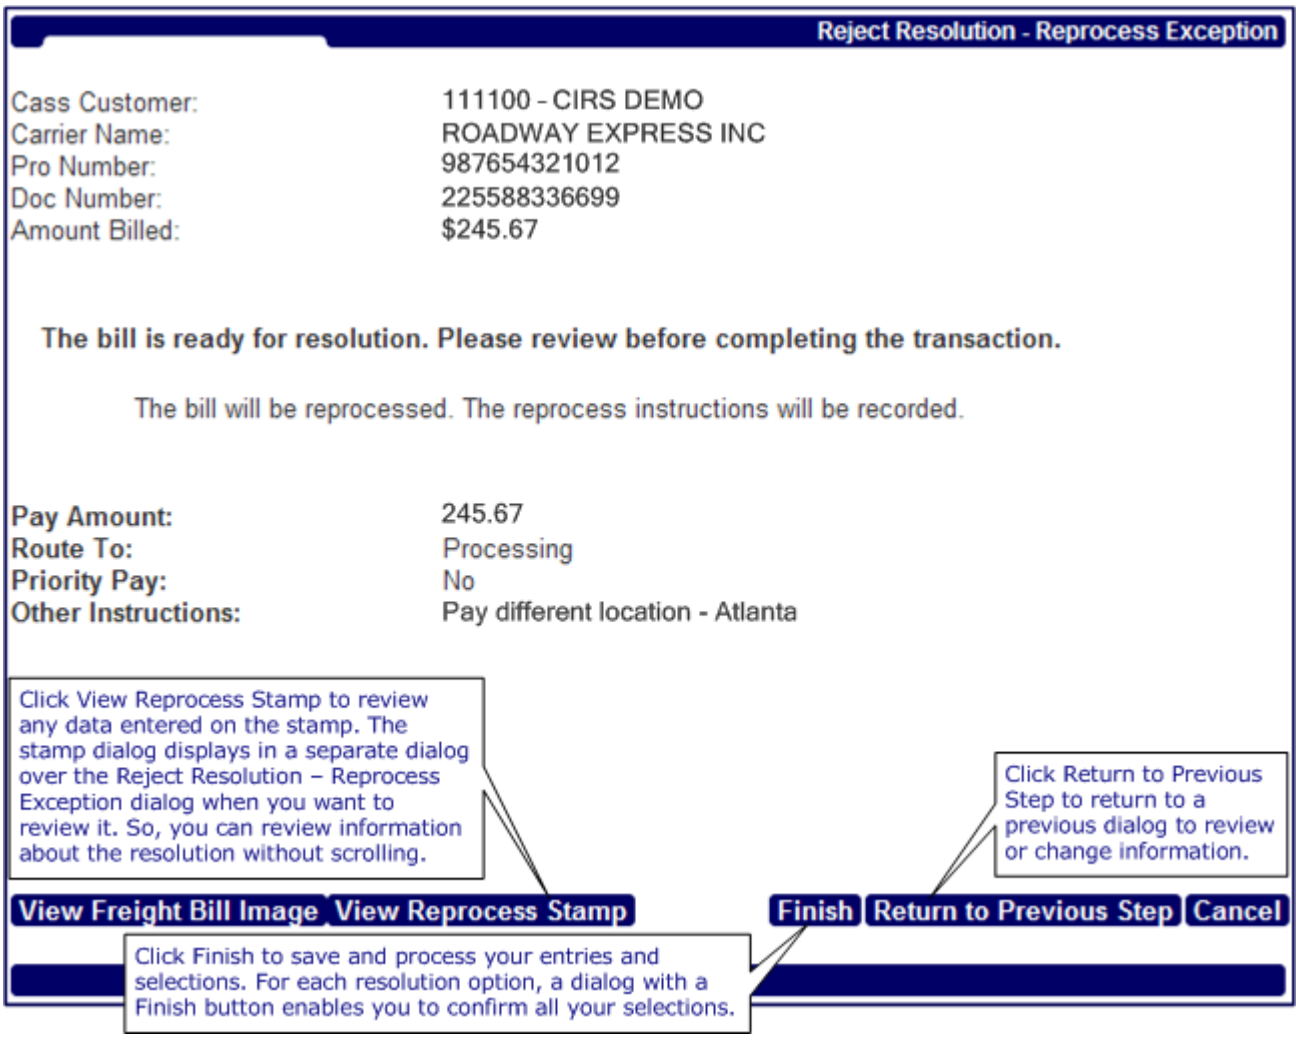

5. When the stamp is complete, click **Save**.

   The Reject Resolution – Reprocess Stamp dialog closes.

6. Click **Continue**.

   The Reject Resolution – Reprocess Exception dialog displays to provide a confirmation dialog.

© 2009 Cass Information Systems, Inc.

7. Review the information on the dialog to confirm everything is correct for the resolution.
8. Review the reprocess stamp, if you completed it and need to confirm your entries:
   - Click **View Reprocess Stamp** to review the Reject Resolution – Reprocess Stamp dialog with the completed stamp. Go to the next step.

     The Reject Resolution – Reprocess stamp dialog displays overlapping the second Reject Resolution – Reprocess Exception dialog.

   or

   - If you did not complete the stamp, go to step 9.

8. When you are finished reviewing the completed reprocess stamp, click **Cancel** to close the Reject Resolution – Reprocess Stamp dialog.

   Note: You cannot save edits to the reprocess stamp from this screen. You must click **Return to Previous Step** to return to the second Reject Resolution – Single dialog to edit and save any changes.

9. Click **Finish** to reprocess the freight bill exception.

   The Reject Resolution – Reprocess Exception dialog closes and the resolved freight bill exception begins reprocessing.

Reprocessing a Single Rejected Freight Bill Exception - Adjust Pay Amount

You are not required to adjust the pay amount when reprocessing a bill. The steps in this section will be executed during reprocessing when you wish to pay a different amount than the amount originally billed.

1. Click **Reprocess** from the first Reject Resolution – Single dialog.

   The second Reject Resolution – Single dialog displays.

2. Enter a new value in the Pay Amount field.
3. Click **Continue**.

   The Reject Resolution – Adjustment Reason dialog displays.

4. Select a standard adjustment reason from the drop down box.

   Reasons are the same for all clients. These reasons provide an overview of the reasons the pay amount might be adjusted for a reprocessed freight bill exception:

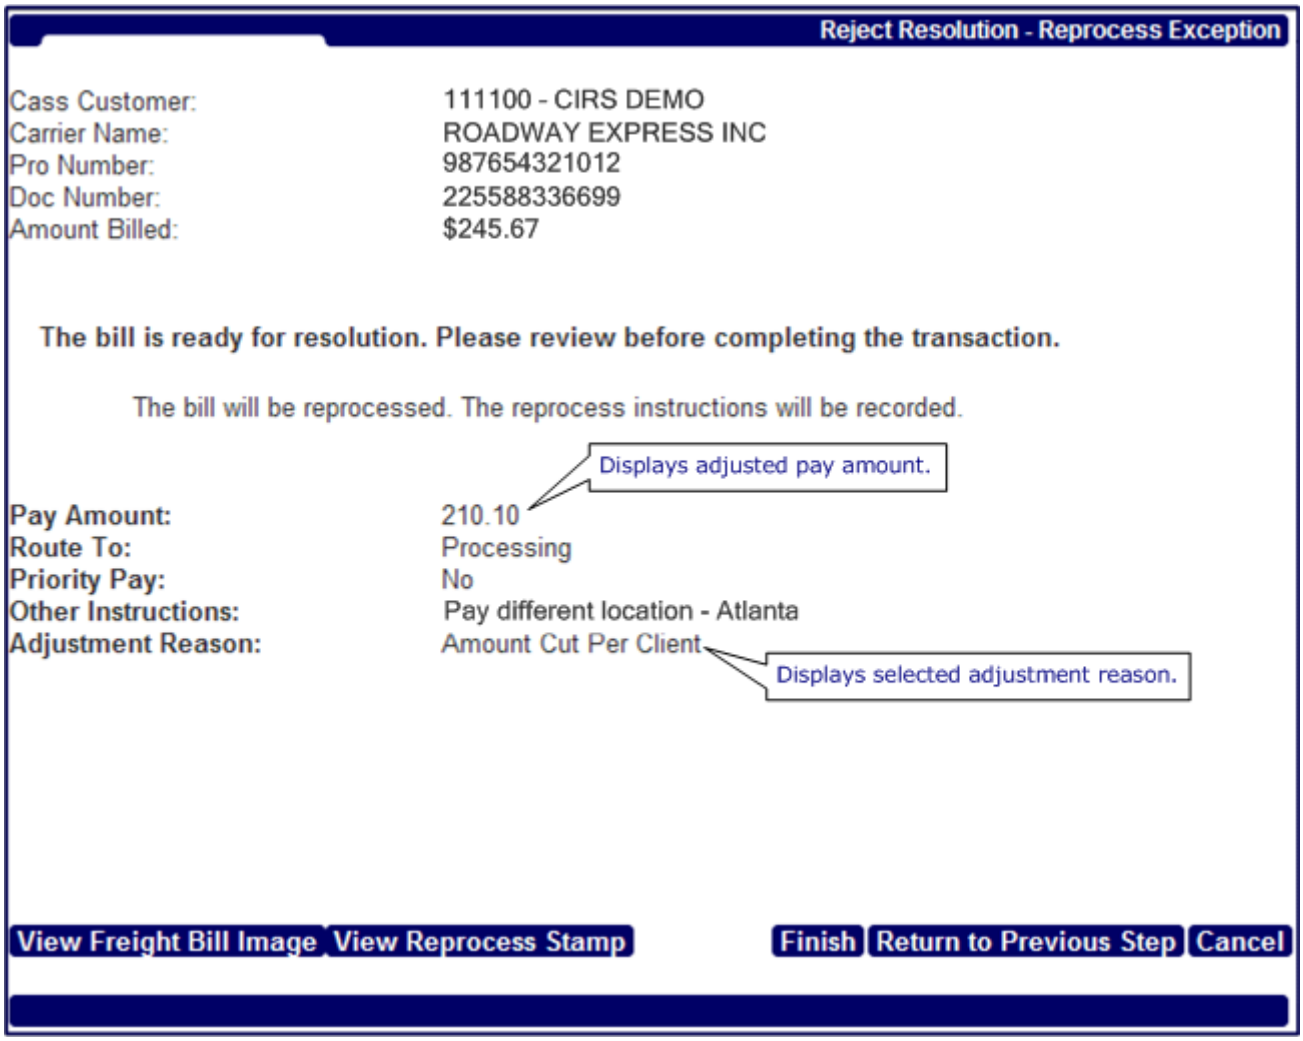

Weight Incorrect	Incorrect Mileage	Service Failure
Rate Error	Amount Cut Per Client	Discount Taken
Error in Extension	Declined Balance Due	Invalid Accessorial Charge
Discount Incorrect	Other Audit Adjustment	Service Failure - POD
Reversed Balance Due		

   Note: The Reject Resolution – Adjustment Reason dialog displays only if you adjusted the Pay Amount field on the second Reject Resolution – Single dialog.

5. Click **Continue**.

   The Reject Resolution – Reprocess Exception dialog displays to provide a confirmation dialog.

Rejecting a Single Freight Bill Exception to the Carrier

1. Click **Reject to Carrier** from the Reject Resolution – Single dialog.

   The first Reject Resolution – Reject Exception dialog displays.

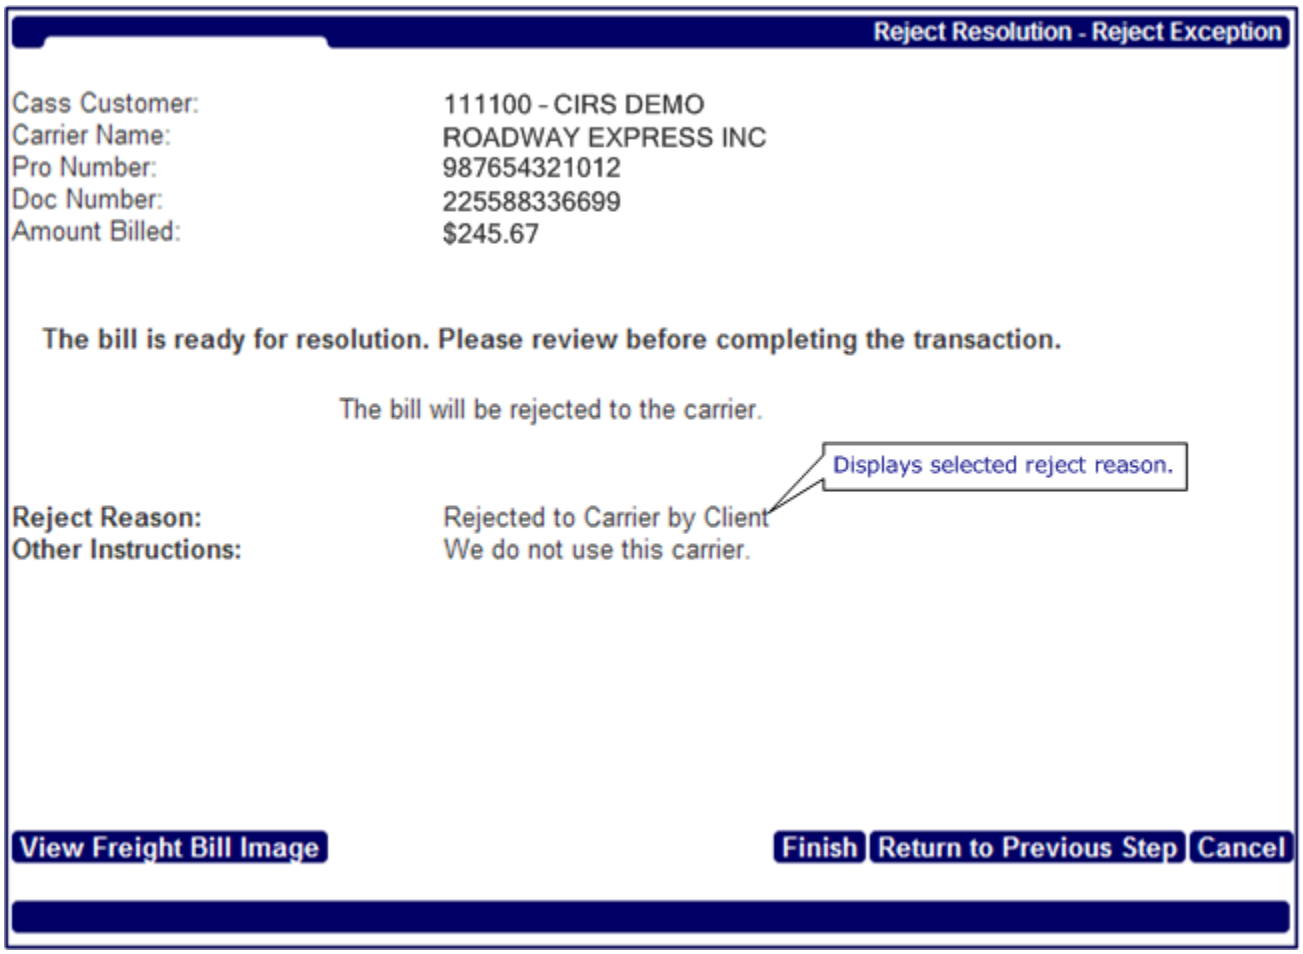

2. Select from a list of up to 99 client-specific reject reasons. If no reject reasons are defined, a single standard reason is available for selection: Rejected to Carrier by Client.

   Work with your Cass Client Relations Representative to define the specific reject reasons you need.

3. If necessary, enter additional information in the Other Instructions field.
4. Click **Continue**.

   The final Reject Resolution – Reject Exception dialog displays.

Discarding a Single Freight Bill Exception

1. Click **Discard** from the Reject Resolution – Single dialog.
   The first Reject Resolution – Discard Exception dialog displays.

2. Enter information about why the bill is being discarded in the Other Instructions field.
3. Click **Continue**.
   The final Reject Resolution – Discard Exception dialog displays.

© 2009 Cass Information Systems, Inc.

5. Review the information on the dialog to confirm everything is correct for the resolution.
7. Click **Finish** to reprocess the freight bill exception.

   The Reject Resolution – Discard Exception dialog closes and the resolved freight bill exception is discarded.

Conclusion

Confirmation dialogs, data entry configured for the resolution option you have selected, and a separate stamp dialog will enable you to resolve bills in FBA more easily and accurately.

For your reference, here is a complete list of the enhancements by category:

Navigation

- Only those fields related to the selected resolution option display for completion. So, the path for resolving the freight bill exception is always clearly delineated.
- The account number and name display at the top of the dialog to ensure you know the account under which the freight bill exception is being processed.
- The reprocess stamp remains hidden unless you choose to complete it. When you choose to complete it, the stamp displays in a separate dialog. So, you can review the freight bill information without scrolling while you are completing the stamp.
- For each resolution option, a confirmation dialog displays to enable you to review all entered or selected information before completing the resolution process.
- When using mass modify, all criteria selected for the freight bill exceptions included in the mass modification display at the top of all dialogs.

Option Clarification

- The Approve option has been renamed Reprocess for clarification and consistency with suspense options. When you select Reprocess, the bill will be reprocessed at Cass with any options or instructions you have entered, such as processing the bill in a different shipper account. To approve a bill while reprocessing, simply fill out the approval stamp.
- The watermark on the Discard stamp has been changed from “Paper” to “Discard” so all resolution stamps match the resolution option selected.

Standardized Reasons

- Easily selected standard reasons for an adjustment to the pay amount reduce the amount of data you must enter and provide a standardized reason for review. (single resolution only)
- Customizable reasons for a reject to the carrier reduce the amount of data you must enter and provide a standardized reject reason for review.
- The selected reason (adjustment or reject) displays with other information on the resolution stamp.

If you have additional questions, please contact your Cass Client Relations Representative.
